Aditya Holkar

SUMMARY

Frontend Developer experienced in building a 50+ component design system from scratch (Carbon-inspired) using React and Tailwind. Skilled in maintaining multiple production websites, API integration, and component-driven architecture.

SKILLS

Frontend: React.js (Hooks, Context API, React Router), Tailwind CSS, Responsive Design, Pixel-perfect UI development, Figma → React workflow

Design-to-Code: Design-to-code implementation, Component-driven development, Responsive web design from mockups, Design system integration

Backend (light): Node.js (Express.js basics), Supabase (PostgreSQL), NeonDB

Architecture: Component-Based Architecture (CBA), Design Systems

Tools: Git, GitHub, Postman, Vite, npm

Other: REST APIs, Code Refactoring, DaisyUI, Carbon Design System (UI)

EXPERIENCE

Capslock Studio Private Limited, Pune— Frontend Developer

June 2023 – October 2025

Capslock Design System

- Architected and built 50+ reusable UI components from scratch using React Hooks and Tailwind CSS, inspired by Carbon Design principles.
- Refactored legacy monolithic code into modular components and established component-based architecture (CBA) for scalability.
- Ensured fully responsive, production-ready components across all screen sizes.

Capslock Data Studio

- Integrated REST APIs and handled data fetching, state management, and error handling across applications.
- Implemented Supabase and Neon DB integrations for real-time data and serverless PostgreSQL workflows.

Additional Projects

- Maintained UI and frontend functionality for 3+ production websites.

EDUCATION

Annasaheb Magar College(Pune University), Pune— *Bsc.(Comp)*

July 2019 - July 2022, Pune

CGPA:-7.7

SIDE PROJECTS

University Explorer — Built with React, DaisyUI, and Hipolabs Universities API.
Features country-based search, data filtering, and responsive design.
