Summary

Frontend Developer experienced in building 50+ component design systems from scratch using React and Tailwind CSS. Skilled in maintaining multiple production websites, API integration, and component-driven architecture. Proficient in modern JavaScript, React ecosystem, and responsive design principles.

Experience

Capslock Studio Private Limited, Pune

Frontend Developer | June 2023 - October 2025

Built smooth, user-friendly UIs with React and Tailwind CSS. Developed and maintained production websites, integrated REST APIs, and implemented state management solutions.

Skills

- **React** — Building component-driven SPAs with modern React (hooks, context, state management)
 - **Tailwind CSS** — Utility-first CSS for rapid, responsive UI development
 - **GSAP** — High-performance JavaScript animation library
 - **Supabase** — Open-source backend with PostgreSQL, real-time subscriptions, authentication
 - **Git** — Version control and collaboration workflows
 - **SQL** — Relational database querying and management
 - **Prompt Engineering** — Optimizing AI interactions for precise outputs
-

Projects

Capslock Design System | *Frontend Design System Engineer*

Built 50+ reusable React components with Tailwind CSS. Refactored legacy code into modular architecture. Ensured full responsiveness across all components.

Capslock Data Studio | *Full Stack Developer*

Integrated REST APIs with data fetching, state management, and error handling. Implemented Supabase and Neon DB for real-time data and serverless PostgreSQL workflows.

Capslock Studios | *Product/Website Maintenance*

Maintained UI and frontend functionality for 5+ production websites. Provided ongoing production support and frontend optimization.

TradeIntel | *Frontend Developer*

Built a React + Vite SPA for global import/export trade intelligence. Implemented dark/light theme system, responsive layout, and component-driven architecture with Tailwind CSS v4.

UniSearch | *Frontend Developer*

Built a React + Vite SPA for discovering 15,000+ universities worldwide. Integrated Hipolabs Universities API, implemented country-based search with table/card views, favorites with localStorage persistence, dark/light theme toggle, CSV export, and visitor analytics.

Taste Atlas | *Frontend Developer*

Built a React + Vite SPA for exploring cuisines worldwide. Integrated interactive Leaflet world map with MealDB API (78+ countries, 200+ recipes), dark/light theme, favorites & bucket list with localStorage, and geolocation-based discovery.

VibeNews | *Full Stack Developer*

Built a React + Vite SPA for curated news discovery with real-time aggregation, search and category filtering, dark/light theme system, and responsive design.

Education

Annasaheb Magar College, Pune (Pune University)

BSc (Computer Science) | CGPA: 7.7 | July 2019 - July 2022
